

CHRIS HARDWICK

WEB APPLICATION DEVELOPER

FRONT-END WEB DEVELOPER

"I believe fluid, clean UI design using striking graphics and typography are as important to expression as words. I'm a digital storyteller and I always love finding design elements that connect with people."

PROFESSIONAL SKILLS

- Responsive Web Design
- Full Stack Development
- HTML 5
- CSS 3
- JavaScript ES6
- Vue 3
- NodeJS
- Godot
- SQL
- C#
- ASP.NET (MVC Pattern)
- Adobe Photoshop
- Adobe InDesign
- Adobe Illustrator

PROFESSIONAL PROFILE

Chris is a creative and experienced website and web application developer with over 10 years of experience creating UI excellence and fluid User Experiences. Chris engineers modern responsive web environments using technologies that engage users in an intuitive, clean connection to well structured data.

Since modern website layouts are necessarily visual and eye-catching, Chris' graphic design talents blend together perfectly with coding precision to create memorable user interfaces.

Chris' focus on teamwork and communication makes him a valuable asset for any team wanting to design and complete a project beautifully or can work independently as required.

LATEST ACCOMPLISHMENTS

WEB APPLICATION DEVELOPER | MAKRÖ GAMING STUDIOS

I developed a full suite of Single Page Applications using the Vue 3 framework to accompany the video slots game application ecosystem for Makrö Gaming Studios. I placed a strong emphasis on responsive clean design, interactivity and readability in order to present and effortlessly manage potentially complex functionality and data. The apps consist of an Admin App, Cashier App, Player App and Report App to facilitate all the behind-the-scenes functions and player facing needs in order to support the game client and the site administrators mostly through REST API calls to the game server.

A robust role and permissions management system was implemented in each application that dynamically renders user interfaces and enables functions based on role/permissions. Authorization for Admin, HelpDesk, Cashier, Reporter, and Player all allow for different access and abilities.

WEB APPLICATIONS DEVELOPED (SPA)

MAKRÖ GAMING STUDIOS | June 2021 to March 2025

Admin App:

- Allows casino administrators to manage casinos and to view and set game settings.
- Admins can enable or disable any games, game types or pay tiers.
- Admins can review all game history, logs and player account status.
- Admins can review each individual game play, showing the reels spin, bonus games, and payouts for each line to help with dispute resolution.
- Game play history can be filtered by game name and date/time range.

Cashier App:

- Handles all cash-in/cash-out requirements of the players. All cash-in is immediately playable in any game in the system.
- View the transaction history for each player account.
- Prints receipts to a connected receipt printer.
- Displays and prints each cashier's bank transaction totals, and starting and ending cash for the shift.

Player App:

- Register new accounts and verify email address or phone number depending on rules set by the site administrator.
- Verify player identification in jurisdictions where this is required.
- Generate QR code on the player mobile app for Cashiers to scan to authorize funds transfers for the player's account.

Report App:

- All reports can be filtered by various parameters and date/time range.
- Game performance data tables to document individual game performance.
- Casino payout liability reports.
- Shows all active players and stats.
